

Manufacturers' Declaration of Conformity

03.03.2021

Self-declaration with regard to the European Chemical Products Regulation No. 1907/2006 (REACH) in connection with the SCIP data base according to the Waste Guideline No. 2008/98/EG

As manufacturer of light fittings and individual lighting solutions TRILUX is a supplier of products in terms of REACH. The products manufactured by TRILUX GmbH & Co. KG are "products" according to the REACH regulation (article No.3).

As per January 2021 manufacturers and suppliers are obliged to report to the SCIP data base of ECHA SVHC (Substances of Very High Concern) candidates greater than 0,1 weight percent in products (Substances of concern in products as such or in complex objects (products)).

As to the Chemicals Act § 16 f the German Federal Government intends to implement it accordingly.

Awaiting relevant statutory regulations we are aware of our obligations.

Regarding the submission of information within the supply chain we are in close contact with our suppliers and have to rely on our suppliers acting according to the legal obligations and informing us as per article 9(1)(i) and 9(2) of the Waste Guideline.

We oblige our Non-EU-suppliers to report to us SVHC candidates greater than 0,1 weight percent in products supplied and to support us in getting relevant SCIP information.

Thus, in accordance with the formal regulations of ECHA, TRILUX to the best of its knowledge reports to the SCIP data base products and complex products containing SVHC greater than 0,1 weight percent.
